## Experience 1 :

**EGHTESAD E NOVIN BANK** : *SENIOR FULL-STACK DEVELOPER- 2020(JUL)-PRESENT*

### Banking Systems :

Maintenance and develop banking applications in various templates with the best performance including APIs, Dashboards, Web Pages, etc. These applications are generally used by organization operators or interactions between banks with each other or with the central bank. Design and develop a service provider as a core wrapper to achieve the best performance in bank card operations. Also providing Redis memory caching to most used data such as card owners or key-value paired data which need to I/O. and used the MongoDB for Log Data

## Experience 2 :

**Golrang Industrial Group** : *SENIOR FULL-STACK DEVELOPER, 2016(MARCH)-2020(JUL)*

My work in Golrang Company is divided into three parts:The first part, which lasted a year, was in HR systems, payroll and clock card, where Tsql and various functions, procedures, Cursor TempTable were used for calculations, and also Asp MVC was used in EndPoint.The second part lasted two years. It was about Sharepoint, which used PowerForm, Nintex, React, and was also part of Rest Api development.

## Experience 3 :

**Sigma** : *Front End Developer 2015(JUL)-2016(MARCH)*

In this company, my work was mostly related to the appearance of the site I used html css bootsatr jquery
